DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 70, 72 and 100. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luce et al. [US 4,008,564].

Luce et al. disclose an electronic watch system [figures 1-5] comprising a substrate [10]; a liquid crystal display cell; an oscillator and associated circuit elements for operating the watch system; and electronic components; wherein the electronic components are encapsulated by sealants/insulators formed of metal [10] or potting/ceramic material [column 4, lines 53-56].

Luce et al. disclose the claimed invention except for saying that the structure reduce thermal drift/increase thermal mass.

Art Unit: 2841

It would have been obvious for the structure disclosed by Luce et al. to reduce thermal drift/increase thermal mass since a larger area for heat dissipation are provided. Further, thermal drift/increase thermal mass (heat dissipating) are inherent characteristic of metals.

Regarding claim 7, Luce et al. further disclose wherein the system comprises a circuit board that holds the electronic component which is separated from a circuit board that holds a set of other components of the circuit [10 and 30; figure 2].

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Matsumoto et al. [US 6,566,741] ; Matsuzawa et al [US 6,472,724] ; Glovatsky et al. [US 5,407,865] ; Johnson et al. [US 4,679,118]; Olschewski et al. [US 4,218,578].
